PROFESSIONAL SUMMARY

Data Analyst & Reporting professional with experience in the fintech industry, specializing in SQL, Python, Power BI, Amazon QuickSight, Google Analytics, and data automation. Experienced in developing dashboards, reporting solutions, data collection and governance processes, and automated workflows to support business operations and decision-making. Skilled in analyzing user behavior, conversion funnels, financial performance, and operational data, with the ability to translate complex datasets into clear and actionable insights for cross-functional stakeholders.

CORE SKILLS

Data Analytics: SQL, Python, R, Data Cleaning, Data Transformation, Statistical Analysis, Data Quality & Validation.

Business Intelligence: Power BI, Amazon QuickSight, Looker Studio, Microsoft Excel, Data Visualization.

Web Analytics: Google Analytics, Google Tag Manager (GTM), Conversion Funnel Analysis, User Behavior Analysis.

Automation & Tools: Microsoft Power Automate, Jira, Microsoft Office Suite

Additional: NoSQL, MATLAB, Weka, RapidMiner, Oracle APEX.

PROFESSIONAL EXPERIENCE

CGC Digital Sdn. Bhd., Petaling Jaya

Data Analyst & Reporting

[September 2026 – Present]

Data Analyst

[January 2025 – August 2026]

- Designed and maintained 10+ business dashboards and reporting solutions covering partner performance, registrations, management reporting, operational KPIs, and executive reporting.
- Managed reporting requirements across daily, weekly, monthly, quarterly, and yearly reporting cycles, ensuring timely delivery of business and management reports.
- Developed dashboards and interactive visualizations using Amazon QuickSight, Power BI, and Looker Studio to provide stakeholders with visibility into key business and operational KPIs.
- Supported 9+ stakeholders/users by translating complex datasets into clear reports, dashboards, and actionable insights for business and management decision-making.
- Designed and implemented data collection and governance processes to improve data integrity, accuracy, completeness, and accessibility across fintech datasets.
- Performed data cleaning and transformation using SQL and Python, converting fragmented raw data into structured, analysis-ready datasets for reporting and analysis.
- Analyzed website performance and conversion funnels using Google Analytics and Google Tag Manager (GTM) to identify user behavior trends and opportunities for optimization.
- Conducted statistical and exploratory analysis to identify patterns, trends, correlations, and insights related to user behavior and financial performance.
- Automated the Management Approval Paper workflow using Microsoft Power Automate, achieving approximately 90% process automation and significantly reducing manual processing

requirements.

- Provided documentation and training to promote self-service analytics and effective adoption of reporting and data tools.
- Collaborated with cross-functional teams through Jira to manage data requests, technical requirements, project activities, and delivery of reporting solutions.

Data Analyst Freelancer

[July 2024 – December 2024]

- Gathered, processed, cleaned, and analyzed datasets to identify trends, patterns, and actionable insights supporting business decision-making.
- Designed data collection and validation processes to maintain data accuracy, integrity, and completeness.
- Developed reports, dashboards, and visualizations tailored to stakeholder requirements and business objectives.
- Applied quantitative and qualitative analytical techniques to transform raw data into structured and actionable business insights.
- Collaborated with cross-functional teams to incorporate data-driven analysis into strategic planning and operational activities.

Data Analyst Internship

[March 2024 – June 2024]

- Developed daily reporting solutions using Amazon QuickSight to monitor user applications and support operational decision-making.
- Assisted in developing real-time Google Analytics dashboards to provide visibility into user activity and key performance indicators.
- Conducted software, website, and product testing to identify functional issues and validate system requirements prior to deployment.
- Tested automated email templates to ensure accurate content, triggers, and production readiness.
- Trained and optimized Dialogflow chatbots to improve automated user interactions and customer experience.

Darulaman Media & Events Sdn. Bhd., Kedah

[September 2021– February 2022]

Web Developer Internship

- Developed and maintained a studio booking and event management system using WordPress, streamlining booking processes and event coordination.
- Designed and developed the company's website using HTML, focusing on a structured, responsive, and user-friendly web experience.
